Seat and Back

Main structure is made from molded PET (polyethylene terephthalate technology). PET shell is made from 100% recycled bottles-converting waste material into a high-quality resource and feed it back into the production cycle.

Upholstery

Seat pad is constructed of 1/2" contoured plywood seat with 2" foam pad (1.8# with a 60ILD density). Seat is upholstered using double top stitch with waterfall edge. Upholstered seat & PET shell is secured to wooden frame with T-nuts and 4 bolts. Plywood seat is FSC certified.

Frame

Legs are made of solid beechwood. Top of legs are 1 3/4" rounded square and taper to 1-1/4" at floor. Legs are secured into beechwood (2 1/8" x 3/4")capron using corner joints and steel bolts. 5/8" round 12 gauge "H" brace secured to legs for stability and footrest. Steel is powder-coated in charcoal color using baked on electrostatic process. Powder-coat is VOC free. (No Volatile Organic Compounds).

Frame Finishes

Stained in Umber or Latte finish.

Weight Ratings

ANSI-BIFMA up to 300 lbs.

Sustainability

All Roqa products are **Indoor Air Quality Gold Certified** through Intertek. See full sustainability story at <https://www.kfistudios.com/Literature/Environmental>

PET

100% Recycled bottles.

Frames
