>KFI Studios (331)

Ambitions is a new desk offered by KFI Studios in an exclusive contract partnership with Dutch design team Umage of Copenhagen. As workstations and workplaces change, the desire to create spaces with an elegantly streamlined and comfortable desk space has become a priority. Ambitions offers storage space without bulk. At just 39" across, it can comfortably fit into smaller spaces, helping users clear their minds and reduce clutter. The desk has a wide central drawer the right size for storing laptops, and the slim-tapered wing compartments can be easily accessed for hiding notebooks, pens, and other small office items. A concealed compartment at the back can hide unsightly wires and extension cords while easily providing access to electricity. Finishes include Oak and White as well as Dark Oak and White. The interplay between the wood and powder-coat materials add a soft, unmistakably Nordic feel.

KFI Studios: Ambitions

Midtown Bench is a new companion piece to the popular Midtown table. Complementing a range of visual styles from traditional to transitional to modern, the bench also works as a stand-alone piece. It is suited to a wide variety of applications and areas including break rooms, co-work areas, student center landing areas, hospitality and transi-

tional spaces. The hand-stained solid wood seat is made in the USA and is available in three finish options: Barnwood, Natural, and a rich Espresso. It is also available as part of KFI Studios' two week upholstery program. Getting to the bottom of it, the single piece base is a 2.25" frame and is constructed of 16 gauge steel and includes poly glides to make moving easy. It is ANSI-BIFMA tested up to 500 pounds. www.kfistudios.com
