

KFI Studios Product Specification Tips

Accommodating the need for flexibility in social distancing and cleaning as a result of COVID-19 remains top of mind for space specifiers. To make those decisions easier, we have created quick product specification tips for using KFI Studios family of products.

Polypropylene Chairs: Bleach cleanable with a solution ration of 10: 1, poly options from KFI Studios include Roqa, Imme, Kool, Express Yourself (indoor / outdoor), Ogee (shell) and Julep. Both Imme and Kool have stack-ability options that make them easy to move in and out of spaces for cleaning.

Furniture Frames: For chairs and tables, powder coat and aluminum frames in the KFI Studios family can be cleaned with a bleach solution ratio of 10:1.

Chairs include: Bodi, Evolve, Imme, Inicio, Jive Julep, Kool, Midtown Bench, Roqa, and Zoso

Tables include: Midtown (frame only), Proof, Workwell, Dailey.

Choose Casters: Many KFI Studios products have casters, making them easy to move and align with current and changing COVID-19 guidelines. KFI Studios offers caster configurations including 4-Leg, 4-star, 5-star and products available with those configurations are polypropylene chairs with 10:1 bleach cleanability. Our Dailey collection of tables is also available on casters in each size (42"sq, 24" x 48, 30" x 60", and 36" x 72") and Dailey frames are bleach cleanable.
