MAKAU | DESIGNED BY QDESIGN

Born from the need for flexible seating within collaborative spaces, Makau is a rocking stool designed as an active seating solution to encourage movement and perching for a more engaged experience. The bent wood frame adds warmth while the rocking movement, handhold cutout, and nesting ability brings function to a fun and stylish seating option.

FEATURES

- Dynamic rocking stool for active seating and perching
- Handhold for easy mobility
- Bent plywood frame with steel plate core
- Waterfall upholstered seat
- Customize with COM or large graded-in selection of upholstery
- Nests on tabletop for quick storage
- Stacks 3 high
