SADDLE | DESIGNED BY QDESIGN

Saddle is a lightweight low stool pressed from plywood for sturdiness and strength. Its playful exterior gives off a fun vibe all while having a serious sustainability impact. Saddle is created using the excess material from the Makau rocking stool to reduce waste. With its integrated handle, this stool can be on the move in an instant so you can pick up and go from space to space. Saddle will make itself at home in classrooms, offices, and touch down areas - anywhere you need to gather as a group and share ideas.

FEATURES

- Low stool with upholstered seat
- Bent plywood construction
- Integrated handle for easy mobility
- Customize with COM or large graded-in selection of upholstery
- Stacks 3 high
