VALE | DESIGNED BY LAYER

The Vale seating collection features an armchair, side chair, lounge chair with ottoman, counter stool, and barstools. With sustainability at the forefront of the design process, recycled plastic bottles create the PET felt shells. The pressed felt shell, with its elegantly contoured form, is used throughout the collection to achieve a harmonious vision. The fluidity of the curved silhouette evokes a softness which is enhanced by the soft texture of the PET felt. The rolled edges provide a source of strength and show visual comfort while the thin tube frame maintains the refined and minimal feel. An upholstered seat offers an extra level of tailored comfort.

FEATURES

- PET felt shell made from recycled plastic bottles
- PET felt offers sound absorption properties
- Durable steel frame
- Frame and PET felt can be mixed and matched or monochromatic
- Optional upholstery available in quick ship Designtex Woolish or large selection of graded-in textiles
