

GarciaTM

Movement throughout the day is key—for body and mind. And Garcia is the power solution that's custom made for this healthier, height-adjustable approach to work. We've partnered with LINAK DESKLINE® to piggyback on the low-voltage power that's already inside their desking products, allowing us to bring that built-in power straight to the worksurface. Low voltage means phones and other USB A or USB C tech charge easily at desk height—whatever that height is. Also available with an external power supply, creating a clean design that sits on (or under) the surface and blends into any environment. Standing or seated—Garcia is there to help you get a real charge out of height adjustable desking.
