

KFi STUDIOS

AVALON | DESIGNED BY UNION DESIGN

Work meets lounge with the Avalon chaise. The sculpted forms of the chaise allow your body to be fully reclined for lounging while keeping your head in an actively engaged position. The split forms of the seat and back create an interesting look of two bent planes of upholstery coming together in a floating connection, creating the feeling of lightness. Avalon becomes your private space where you can focus on getting work done or simply relax in between meetings. Use it on its own or pair it with its accessories – swivel table and/or screen with side table and coat hook.

FEATURES

- Clean look with no exposed fasteners
- Seamless 3D technical shape knit reduces textile waste
- Ergonomic seating for maximum comfort while lounging
- Durable steel frame construction
- Choose between 3D knit or traditional upholstery
- Swivel table has 360° swivel, integrated device stand, and is height adjustable from 25"-30"; can be left or right mounted
- Privacy screen comes with side table and coat hook; can be left or right mounted
- Knock down assembly
