## JADE | DESIGNED BY UNION DESIGN

Jade brings new aesthetics, ergonomics, and sustainability to the mainstay work chair. The gentle, inviting forms of the Jade chair along with its minimal impact on the environment make Jade a refreshing option for any commercial interior. The soft curves of the chair are enhanced by the textured PET felt and the 3D knit, both made from recycled plastic bottles. For effortless comfort, the weight-sensitive mechanism automatically adjusts to the user's body. Plus, the height-adjustment and tilt lock controls are discreetly integrated into the front corners of the seat, eliminating the need for unsightly levers and knobs.

*\*Patent pending*

## FEATURES

- PET felt back and seat pan; made from recycled plastic bottles
- PET felt offers sound absorption properties
- 100% REPREVE® recycled polyester 3D knit eliminates textile waste
- Durable steel frame
- Ergonomic tasking with weight-sensitive mechanism
- Adjustable tilt and pneumatic height
- PET felt or polyurethane arm pads
- Dual wheel, soft tire casters for hard floors or carpet
